

AUTODESK® REVIT® ARCHITECTURE

CERTIFIED USER AND 2015 CERTIFIED PROFESSIONAL

Exam preparation road map. Autodesk certifications are industry-recognized credentials that can help you succeed in your design career.

PREPARE FOR SUCCESS

Autodesk certifications provide reliable validation of knowledge and skills. These credentials can lead to accelerated professional development, improved productivity, and enhanced credibility.

Your examination preparation is critical for your success. Schedule time to prepare, review this exam preparation road map, take a course at a Certiport Authorized Testing Center (CATC), and support your studies with official preparation materials. Equally as important is actual hands-on experience.

CERTIFICATIONS LEVELS AVAILABLE

The Revit Architecture Certified User exam includes both academic and industry requirements designed to confirm that Autodesk® Revit Architecture® software users have the skills necessary to continue their design careers—whether they attend college, enter the workforce, or work toward additional levels of industry certification.

The Revit Architecture 2015 Certified Professional exam is aimed at assessing advanced users' knowledge of the tools, features, and common tasks of Revit Architecture 2015.

RECOMMENDED EXPERIENCE LEVELS

Actual hands-on experience is a critical component in preparing for the exam. You must spend time using the product and applying the skills you have learned.

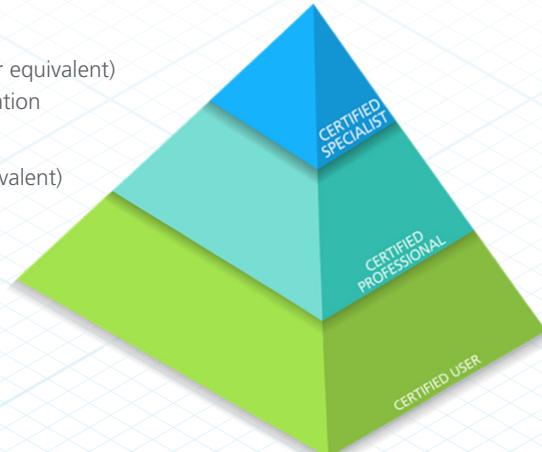

Certified User exam:

- Revit Architecture 2015 course (or equivalent) plus 50 hours of hands-on application
- Certified Professional exam: Revit Architecture 2015 course (or equivalent) plus 400 hours of hands-on application

OFFICIAL PREPARATION MATERIALS

Certiport provides a full certification pathway, sometimes referred to as the Learn-Practice-Certify pathway. This simply means that Certiport provides the courseware and training materials, practice tests and certification exams needed to build a successful certification program.

Certiport Representatives are knowledgeable and well-trained to recommend a solution that meets the needs and objectives for every customer. This saves time and money, and simplifies the process of getting exactly what you need. For more information, contact your Certiport Representative or go to www.certiport.com today.

EXAM TOPICS AND OBJECTIVES

We recommend that you review the topics and objectives during preparation for certification. Please note that some objectives may not be tested on your certification exam.

The Autodesk Certified User exam consists of about 30 questions combining multiple choice, matching, point-and-click (hot-spot), and performance-based question types to ensure students understand and can effectively use Inventor. The exam has a 50-minute time limit.

The Autodesk Certified Professional exam is comprised of about 35 questions, of which the majority requires you to use Inventor to create or modify a data file, and then type your answer into an input box. Other question types include multiple choice, matching, and point-and-click. The exam has a 2-hour time limit (in some countries, the time limit may be extended).

	USER	PROFESSIONAL
USER INTERFACE		
Change the view scale	✓	
Identify file types	✓	
Identify primary parts of the User Interface (UI)	✓	
Use the Project Browser	✓	✓
COLLABORATION		
Copy and monitor elements in a linked file		✓
Import DWG and image files		✓
Use worksharing		✓
DOCUMENTATION		
Create a title sheet	✓	✓
Create and modify filled regions		✓
Place detail components and repeating details		✓
Set the colors used in a color scheme legend		✓
Tag elements (doors, windows, etc.) by category		✓
Use dimension strings		✓
Work with phases		✓
ELEMENTS		
Change elements within a curtain wall		✓
Create a new family type		✓
Create a stacked wall		✓
Create and modify walls	✓	
Create compound walls		✓
Differentiate system and component families		✓
Edit doors	✓	
Edit windows	✓	
Tag elements (doors, windows, etc.) by category	✓	✓
Trim objects	✓	
Work with family Parameters		✓
FAMILIES		
Assess review warnings in Revit		✓
Use Family creation procedures		✓
Work with families	✓	✓
MODELING		
Add dimensions	✓	
Add model text to a plan	✓	
Attach walls to a roof or ceiling		✓
Change a generic floor/ceiling/roof to a specific type		✓
Create a building pad		✓
Create a roof and modify roof properties	✓	
Create a stair with a landing	✓	✓
Create elements such as floors, ceilings, or roofs		✓
Define floors for a mass	✓	✓
Edit a model element's material		✓
Edit room-aware families		✓
Generate a toposurface		✓
Model railings	✓	✓
Use grids	✓	
VIEWS		
Control visibility		✓
Create a duplicate view for a plan, section, elevation, drafting view, etc.		✓
Create a schedule and add schedule tags	✓	
Create and manage legends		✓
Create section views	✓	
Define element properties in a schedule		✓
Manage view position on sheets		✓
Organize and sort items in a schedule		✓
Use levels	✓	✓
